INDICES OF DEPRIVATION 2010

Appendix 1

DOMAIN INDICATORS

The English Indices of Deprivation 2010 comprise 38 separate indicators, organised across seven distinct domains of deprivation.

These domains are combined, using appropriate weights, to calculate the Index of Multiple Deprivation 2010 (IMD 2010).

This is an overall measure of multiple deprivation experienced by people living in an area and is calculated for every Lower layer Super Output Area (LSOA) in England.

The ID 2010 *ranks* every LSOA in England according to their relative level of deprivation.

The index is made up of seven LSOA level domain indices, although each domain is not given equal weighting.

These are (with weightings shown in brackets):

- | | |
|--------------------------------------|---------|
| 1. Income | (22.5%) |
| 2. Employment | (22.5%) |
| 3. Health deprivation and disability | (13.5%) |
| 4. Education, skills and training | (13.5%) |
| 5. Barriers to Housing, and Services | (9.5%) |
| 6. Living Environment | (9.5%) |
| 7. Crime | (9.5%) |

Indicators Used In The Domains

(Full details of these indicators is provided in the DCLG guidance)

Income Domain

For each domain a score and a rank are provided. For the income and employment domains the score is a **rate**, for example an income score of 0.25 means that 25% of people in the LSOA are income deprived.

A combined count of income deprived individuals calculated by summing the following five indicators:

- Adults and children in Income Support families
- Adults and children in Income-Based Jobseeker's Allowance families
- Adults and children in Pension Credit (Guarantee) families
- Adults and children in Child Tax Credit families (who are not in receipt of Income Support, Income-Based Jobseeker's Allowance or Pension Credit) whose equivalised income (excluding housing benefits) is below 60 per cent of the median before housing costs
- Asylum seekers in England in receipt of subsistence support, accommodation support, or both.

Note: There are two supplementary indices, one relating to Income Deprivation Affecting Children (IDAC) and also an index of Income Deprivation Affecting Older People (the IDAOP).

Employment Domain

A combined count of employment deprived individuals calculated by summing the following seven indicators:

- Claimants of Jobseeker's Allowance (both contribution-based and income based), women aged 18-59 and men aged 18-64
- Claimants of Incapacity Benefit aged 18-59/64
- Claimants of Severe Disablement Allowance aged 18-59/64
- Claimants of Employment and Support Allowance aged 18-59/64 (those with a contribution-based element)
- Participants in New Deal for 18-24s who are not claiming Jobseeker's Allowance
- Participants in New Deal for 25+ who are not claiming Jobseeker's Allowance
- Participants in New Deal for Lone Parents aged 18 and over (after initial interview).

Health and Disability Domain

- Years of Potential Life Lost: An age and sex standardised measure of premature death.
- Comparative Illness and Disability Ratio: An age and sex standardised morbidity/disability ratio.
- Acute morbidity: An age and sex standardised rate of emergency admission to hospital.
- Mood and anxiety disorders: The rate of adults suffering from mood and anxiety disorders.

Education Domain

An overall education score and ranking is provided at LSOA level and there are sub-domains for children and young people and also for skills

Sub-domain: Children and Young People

- *Key Stage 2 attainment*: The average points score of pupils taking English, maths and science Key Stage 2 exams.
- *Key Stage 3 attainment*: The average points score of pupils taking English, maths and science Key Stage 3 exams.
- *Key Stage 4 attainment*: The average capped points score of pupils taking Key Stage 4 (GCSE or equivalent) exams.
- *Secondary school absence*: The proportion of authorised and unauthorised absences from secondary school.
- *Staying on in education post 16*: The proportion of young people not staying on in school or non-advanced education above age 16.
- *Entry to higher education*: The proportion of young people aged under 21 not entering higher education.

Sub-domain: Skills

- *Adult skills*: The proportion of working age adults aged 25-54 with no or low qualifications.

Barriers to Housing and Other Services Domain

An overall score and rank is given for this domain and also values for sub-domains as detailed below.

Sub-domain: Wider Barriers

- *Household overcrowding*: The proportion of all households in an LSOA which are judged to have insufficient space to meet the household's needs.
- *Homelessness*: The rate of acceptances for housing assistance under the homelessness provisions of housing legislation.
- *Housing affordability*: The difficulty of access to owner-occupation, expressed as a proportion of households aged under 35 whose income means that they are unable to afford to enter owner occupation.

Sub-domain: Geographical Barriers

- *Road distance to a GP surgery*:
- *Road distance to a food shop*:
- *Road distance to a primary school*:
- *Road distance to a Post Office*:

Crime Domain

- *Violence*: The rate of violence (19 recorded crime types) per 1000 at-risk population.
- *Burglary*: The rate of burglary (4 recorded crime types) per 1000 at-risk properties.
- *Theft*: The rate of theft (5 recorded crime types) per 1000 at-risk population.
- *Criminal damage*: The rate of criminal damage (11 recorded crime types) per 1000 at-risk population.

Living Environment Domain

An overall score and rank is provided for this domain, formed from two sub domains relating to the indoor and outdoor environment.

Sub-domain: The 'indoors' living environment

- *Housing in poor condition*: The proportion of social and private homes that fail to meet the decent homes standard.
- *Houses without central heating*: The proportion of houses that do not have central heating.

Sub-domain: The 'outdoors' living environment

- *Air quality*: A measure of air quality based on emissions rates for four pollutants.
- *Road traffic accidents*: A measure of road traffic accidents involving injury to pedestrians and cyclists among the resident and workplace population.

GEOGRAPHY

- **Super Output Areas**

Super Output Areas (SOAs) are small geographic areas and have a population of between 1,000 and 3,000 compared with ward areas which are much larger (with a population of between 800 and up to 35,000). SOAs allow for better statistical comparison as they are of a much more consistent size, they should not be subject to frequent boundary change making them more suitable for comparison over time. They also relate to data for Output Areas (which are smaller areas than SOAs) e.g. 2001 Census of Population and it is intended that much of the data available through Neighbourhood Statistics will be recast to SOA boundaries.

There are 3 separate layers to SOAs :-

- *Lower layer* – average population of 1,500 (min 1000)
- *Middle Layer* – average population 7,500
- *Upper layer* – still being devised likely to average 25,000 population

The deprivation index uses the lower layer of SOAs (abbreviated to LSOA).

There are 32,483 LSOAs in England and they are ranked according to how deprived they are, relative to other LSOAs, with '1' being the most deprived LSOA. The output provided at LSOA level allows for identifying areas 'hot spots' of deprivation.

In West Sussex there are 503 LSOA areas – the number in each LA area is shown below.

WARD LEVEL Income Deprivation

NOTE : The data shown below are from the indices of deprivation 2004, 2007 and 2010. The background information which was used in the indices relates to 2001/2 (for the 2004 index), 2005 (for the 2007 index) and 2008 (for the 2010 index).

There are three tables for each local authority area:-

- Table 1 – Income deprivation affecting all people.
- Table 2 – Income deprivation affecting children.
- Table 3 – Income deprivation affecting older people.
